

Towards A European Certification Scheme for Security Products, Systems and Services

A Workshop on the CRISP Roadmap and implementation

11 MAY 2016

11.00 – 17.30, DELFT

Background: CRISP (Evaluation and Certification Schemes for Security Products) is a three year project (April 2014 – March 2017) that aims to facilitate a harmonised playing field for the European security industry by developing a robust methodology for security Products, Systems and Services (PSS) certification, specifically in the application area of alarm systems. CRISP will enhance existing security evaluation and certification schemes by offering an innovative evaluation methodology that integrates security, trust, efficiency and freedom infringement assessment dimensions.

To facilitate the uptake of the proposed CRISP certification scheme a roadmap was developed that incorporates the vision of the certification scheme, the implementation measures, steps required on the part of different stakeholders and the timeline with milestones.

We kindly invite you to attend the workshop on the CRISP Roadmap and implementation that will be held in Delft, on May 11, 2016.

Aims of the workshop: The workshop is aimed at both supply and demand side of security systems (alarm systems), as well as at policy makers, regulators, certification, and accreditation bodies. The main goal of the workshop is to present and discuss the draft Roadmap. We will seek your feedback to our findings, which will help us to improve and revise our output.

The Venue: The workshop is organised by NEN and will be held at the WestCord Hotel in Delft, Netherlands.

WestCord Hotel Delft
Olof Palmestraat 2
Delft

To register please visit: <https://www.nen.nl/Evenementen/CRISP-1112May2016.htm>. Deadline for registration is 6 May 2016. The number of participants is limited. The workshop is free of charge.
