

Towards A European Certification Scheme for Security Products, Systems and Services

A Workshop on the CRISP Certification Manual

12 MAY 2016

9.00-15.00, DELFT

Background: CRISP (Evaluation and Certification Schemes for Security Products) is a three year project (April 2014 – March 2017) that aims to facilitate a harmonised playing field for the European security industry by developing a robust methodology for security Products, Systems and Services (PSS) certification, specifically in the application area of alarm systems. CRISP will enhance existing security evaluation and certification schemes by offering an innovative evaluation methodology that integrates security, trust, efficiency and freedom infringement assessment dimensions.

To facilitate the development of the final scheme, a so-called Certification Manual is developed that will provide basic information and guidelines for establishing the proposed CRISP scheme. This will be done by specifying standards and (basic) requirements for [evaluation and] certification for a concrete PPS category (Alarm systems) as well as setting out the roles and responsibilities of the various stakeholders involved, such as certification and accreditation bodies and inter alia.

We kindly invite you to attend the workshop on the CRISP Certification Manual that will be held in Delft, on May 12, 2016.

Aims of the workshop: to present and discuss the draft Certification Manual with invited stakeholders from certification and accreditation bodies especially in the field of alarm systems certification.

The workshop is aimed specifically at certification and accreditation bodies.

The Venue: The workshop is organised by NEN and will be held at the WestCord Hotel in Delft, Netherlands.
